Venue	College Campus, Jamuary, Kanke, Ranchi
Briefing by	Dr. Dhananjay Prasad (Principal); Professor (Dr.) Jung Bahadur Pande
Participants	Principal, teaching and non-teaching staff, and students

Introduction

N.N. Ghosh Sanatan Teacher Training College, in association with the Internal Quality Assurance Cell (IQAC), is organising a 6-Day Swachhata, Environmental Awareness & Sustainability Programme under Special Campaign 6.0 – 2026. The programme promotes cleanliness, sanitation, environmental responsibility and community participation among students.

As part of this programme, a Plastic-Free Campus Drive was held on 06 October 2026 on the college campus, under the Day 4 theme of 3R (Reduce–Reuse–Recycle), Plastic-Free Campus and Student Awareness Activities.

Proceedings

The programme began with a briefing by the Principal, Dr. Dhananjay Prasad, who told all participants about the day's programme and what was to be done. Professor (Dr.) Jung Bahadur Pande also spoke and made the participants aware of the importance of the programme.

Teaching staff, non-teaching staff and students then took part in the drive together. They moved across the campus grounds and collected unnecessary plastic lying around, so that the campus could be made free of plastic waste.

Objectives

- To make the college campus free of unnecessary plastic.
- To make students and staff aware of the harm caused by plastic waste.
- To promote the 3R practice – Reduce, Reuse and Recycle.
- To encourage shared responsibility for keeping the campus clean.

Conclusion

The drive was carried out successfully with active participation from teaching staff, non-teaching staff and students, and all the unnecessary plastic was removed from the campus. The activity strengthened the message of a clean and plastic-free campus. The IQAC thanks the Principal, the guest speaker, the faculty members, the staff and the students for their involvement.
